present moment is the delimitation of the English and German spheres of influence in East Africa. The Home papers are full of Congo State. The King of the Belthe audject. Stanley has been doing till gians, es a private individual, counce carry best since his return to make the British on the Government work langer, and we lion assert his rights to a large share doubt very much it the little country of of the plunder. The Imperial Govern, Begium would here to saddle itself with ment has been accused of truckling the entire responsibility for such a vast to Germany and of basely surrendering territory. The American warn about Engstrips of country as large as France and land having bought-up the State, we cannot Germany. It must be admitted that the vet take as serious. The correspondent of Goods per Paking undelivered after this position of Lord Salisbury during the last the New Fork Sun is not a very reliable few months has not been enviable. On the suthority That Bigland, however, might one hand he had to meet the claims of a buy a slice of the tendory on the Leafern Goods per Yuenemy andelivered after the great friendly nation and on the other hand frontier is by no means improbable, an she

he had to satisfy as best he could the demands of the British politice commercial companies interested in Africa and of the yery strong party in England in fayour of colonisi expansion. The telegram which we published last night with regard to the Anglo-German convention shows that he has entisfectorily solved most, if not all, of the difficulties with which he had to contend. Of this very important convention, Reuter sent us no direct information. The Noon. Extraordinary Meeting of The first news we obtained was from the Singapore papers. In them mention was only made of Zanzibur, Witu and Somaliland. We gave the opinion that what was meant by Somaliland was the whole country to the North of the British sphere of influence, extending to the Gulf of Aden. This opinion, we now find is correct. With was a break in the chain northward, and as compensation for the renunciation of the German claims thereto we have ceded Heliogoland. And we have made a good bargain. In addition, the convention provides that Great Britain chall have exclusive protectorate over Zanzibar. This is a settlement which is even of more importance to India than to Great Britain. In truth, Indian merchants have flocked in such numbers to the island that Zanzibar might almost be considered as part of VATE invite attention to the following old India. There is, however, one small V landed Brands, all of which are ex- difficulty here that has yet to be got over. France has dug out an old convention made about thirty years ago, according to which the independence of Zanziber is recognised; and she claims that England cannot assume the protectorate without previous agreement with her. The appearance of Germany on the scene, the cession by the Sultan of part of his rights to English and German companies and many other events since 1862, have entirely changed the aspect of things. Frence's claim can.

Case. Per Bet. not therefore be regarded as serious. Zanzi. bar was virtually, if not actually, a British protectorate before the Germans descended 1.10 on the coast, and the new convention only confirms us in what was really our own. The first brief telegrams that were published led to the belief that the Anglo-1.50 German Convention only dealt with a few of the difficulties, that the great question 0.60 of the possession of the great African lakes had been left in abeyance. It now appears, however, from the more detailed telegrams in the Indian papers that an effort has also been made to deal with the whole East African question. The details of the

arrangement proposed with regard to the Lakes districts are still very indefinite, and we are obliged to fill up blanks with conjectures. It is satisfactory to know, however, that such a strong advocate of English claims as: Mr Stanley highly onlo-2 doz. gises the convention, and that the Landon Pints. press, which has all along been gowling Salisbury into action, also expresses satis-\$4 \$4.50 faction. The Stevenson Road, which is 4.50 5.00 to be the Southern boundary of the two . 11 12.00 apheres, is a road that was constructed by the British African Lakes Company. It commences at the Northern extremity of Lake Nyassa and extends for about sixty . \$12 \$1.10 miles on the high tableland between that lake and Lake Tanganyika. From the termination of the road proper there is a good Red Capsule 18 1.50 tract leads to the latter lake, so that the Stevenson Road may fairly be described as Vintage, Red Capsule . 24 2.00 a road connecting the two lakes. As it was constructed by an English Company, there liave been loud outories against the supposed intention of ceding it to Germany. We gather from the telegrams that this Road and all Nyassaland remain within the sphere of British influence, the Germans, however, having the right to send their goods freely between Lake Nyassa and the Congo. Nothing is stated about the country along the shores of Lake Tanganyika. It is therefore impossible to say whether the German sphere will extend so far West. 12 1.10 Even if it does, there can be no doubt that the Lake itself remains free to British trade 8 0.75 and settlement; as the Germans have the right to send their goods freely between Lake Nyassa and the Congo, so to the Bri-Old, Green Capsule . . . 12 1.10 tsh has the right been given to traffic freely between Lake Tanganyika and the pos-. . 10 1.00 sessions of the British East Mirican Com pany. We suppose that, with this very important reservation, the territory between the North of Lake Tanganyika and Victoria Nyanza is recognised to be under German influence. As to the fate of Ugande, nothing is said. From its geo. graphical position at the North West of Lake Victoria Nyapza, one would say that it naturally falls within the British sphere. It lies also so close to the actives of the Nile that we cannot think Lord Splishury would allow German juffornce to prepon-11.30 A.M., after which hour they may ha publication of this issue commenced derate in that state. THE OPIUM D. TY IN INDIA. The Bombuy Guzette says :- R ther more han three months have passed since a memorial was sent by the opium shippers of Oredits, 4 Bombay to the Government of India, pointing out the serious position in which m Pansthe trade with China in Malwa opium had fallon, and suggesting for its relief that the pass duty, now levied at the rate of Rs. 650. per chest should be reduced by Rs. 150 this measure, the memorialists representing, being the only one that can save the trado from gradual extinction. No response has yet come to the inemerial; bu ts gravity has in the interval been emphasized by the retirement of some of the Bombay dealers from a trade which is understood to have been for a long time curried on at a loss, and in which the principle of the survival of the fittest is now being exemplified by the continuance in it mainly of rarge capitalists who can afford to re main in it. bay shipments it is evident that the problem to which the attention of Sir David Barbour has been invited is one of some complexity. That part of the problem. however, which directly affects Bombay trade may be stated without difficulty. The shipments for some years must have shown a strong and persistent tendency to decrease. Fifteen years ago, when the rate of duty was only Re. 60) per chest, the number of chesis of Malwa opium on which duty was paid was little under lielt-u-lukh. In the year 1888 89 the ac und namber of clies is imported into Bombey was 31,617. We are not un e to extend the comparison of shipments to China over so long a period. But if only the last four years are taken a continuous falling off is clearly shown. In 1885-86, 27 173 chests were exported to China; in 1888 c9 the exports amounted only to 29,779 c esta and later monthly returns show that the tendency to vecrease is continuous. Prices in the same period have fluctuated considerably, the average rates for old and new varying from R. 1,528 m November 1888 to Rs. 1,115 in March 1887. The present price of the new drug, including the duty of Rs. 650 per chest, is Res 1,050 per chest. But this year there has been a bumper crop in Mulwa, and there is no demand for the newer stocks, while opium of last year's menufacture is now worth about Rs. 1.160

The first time I met her, says the Tribune correspondent, was time. She came in with money she ha been collecting at a lunch for some British charity, to give it to the Ambassadress, who received her in a greenhouse beside a little table. The senson was the post-Easter one. Trees in the garden were in their robe of tender green. Flowers were abloom every-where within the greenhouse and outside. The Countess had on a bonnet with a leaf that rose high and was set on a wreath of roses in full bloom. She had just a touch of matronliness. Her delicately tinted skin was blooming as the roses and she looked a goddess Flora dressed by a Parisian femme de chambre. MAINE GIRLS CHAT WITH BISMARCK.

A few weeks ago a company of young adies from Maine made a vow that they would not only see Bismarck, but shake ands with him. And they accomplished their vow in the most easy and natural manner. The occasion was a bazaar given at the British Embassy in Lady Cowley's at Bismarck's Palace in Berlin for the beneat of the Zehnen. Phennig Society, or society for the aid of the poor. The Maine girls repaired to the palace at 1.30 p.m. and found the apartments crowded with people buying goods, much as is done in our New England bazzars. Presently the young ladies saw that the worshipers of Bismarck began to be aware of his presence, and half a dozen bouquets were placed in his hands.

> What lovely flowers the Prince has! said one of the girls in English. Bismarck overheard the remark and If I had more I would add them to your

HOW PILLS ARE MADE. The Custom of taking medicine in the form of pills dates far back in history. The object is to enable us to swallow ensily in a condensed form disagreeable and nauseous, but very useful, drugs. To what vast dimensions pill-taking has grown may be imagined when we say that in England alone about 2,000,000,000 (two thousand million) pills are consumed every year. In early days pills were made slowly by hand, as the demand was comparatively small. To-day they are produced with infinitely greater rapidity by machines especially contrived for the purpose, and with greater accuracy, too, in the proportions of the various ingre-

dients employed. No form of medication can be better than a pill, provided only it is intelligently prepared. But right here British Medical Journal. occurs the difficulty.
